

# Vijay Krishna Parvathaneni

CRM Test Lead

10 Years 5 Months

(+91) 9505444660

vijay.qacrm@gmail.com

## Profile Summary

Senior CRM/ERP Test Lead with 10+ years of experience across Salesforce, Microsoft Dynamics 365, and ERP platforms including SAP and Infor M3, specialising in end-to-end QA for enterprise transformation and integration programs.

Proven expertise in functional, integration, regression, UAT, data, security, and API testing across complex CRM and ERP ecosystems, with hands-on experience in Infor M3, IDM, ION OneView, and Dynamics 365.

Risk-focused, shift-left QA leader who proactively analyses requirements, business processes, integrations, dependencies, and downstream impacts to identify and prevent defects early.

Skilled in Agile delivery, Tosca automation, migration and data validation, QA strategy, and offshore QA coordination, including account-level governance, team coordination, status reporting, resource reviews, and escalation management. Experienced in leading and mentoring QA teams supporting US and UK clients.

## Key skills

- MS Dynamics CRM Testing
- Functional Testing
- Integration Testing
- Regression Testing
- System Testing
- Retesting
- Manual Testing
- Salesforce Testing
- SFDC
- Test Case Execution
- Defect Reporting
- Agile Testing
- Defect Life Cycle
- CRM Testing
- SFDC Testing
- UAT
- SIT
- SQL Database Testing
- MS Dynamics CRM
- Team Leading
- Team Management
- Tricentis Tosca
- Azure DevOps
- Risk Assessment
- Risk Management
- Requirement Analysis
- Traceability Matrix
- Functional Test Planning
- Test Strategy
- Stakeholder Management
- Cross-Functional Team Leadership

## Personal Information

City Vijayawada

Country INDIA

## Languages

- English
- Telugu

## Education

B.Tech/B.E., 2011

Jawaharlal Nehru Technological University, Kakinada (JNTUK)

12th, 2007

Andhra Pradesh, English

10th, 2005

Andhra Pradesh, English

## Work Experience

Jul 2025 - Present

CRM Test Lead

ThoughtQuad Private Limited (Kerv Digital)

Client: The Scouts Association (UK)

Project: TSA CRM Transformation & Membership Management Programme - Salesforce & Microsoft Dynamics 365

Leading end-to-end QA for a large-scale CRM transformation programme involving Salesforce, Microsoft Dynamics 365 CRM, Azure, React-based Membership Portal, APIs, middleware, cache layers, and multiple third-party systems, supporting membership, volunteer lifecycle, compliance, learning, training, permits, and governance processes across the UK.

- Led end-to-end QA across Salesforce and Microsoft Dynamics 365 CRM

- Hindi

ecosystems, covering Functional, Integration, System, Regression, End-to-End, and UAT testing.

- Reviewed business requirements, user stories, acceptance criteria, and functional specifications to identify test scenarios, risks, dependencies, and coverage.
- Designed and executed comprehensive test cases and test data for Salesforce and Dynamics 365 CRM business processes.
- Performed Salesforce functional testing covering Sales Cloud/Service Cloud CRM functionality, objects, fields, relationships, workflows, Salesforce Flows, business rules, approvals, validation rules, profiles, roles, permission sets, and security controls.
- Performed Microsoft Dynamics 365 functional testing covering entities, forms, views, business rules, workflows, security roles, permissions, and CRM business processes.
- Validated end-to-end customer/member lifecycle processes across Salesforce, D365, Membership Portal, APIs, middleware, cache layers, and third-party applications.
- Performed Salesforce data validation using SOQL, Salesforce Inspector, and Workbench to verify field-level data accuracy, relationships, business rules, and integration results.
- Validated Dynamics 365 and backend data using SQL queries and database-level verification.
- Performed API and integration testing using Postman, validating REST APIs, request/response payloads, field mappings, transformations, error handling, and data synchronization.
- Validated integrations involving CRM, APIs, middleware, cache/database layers, and event-driven/asynchronous processing.
- Tested CRM security models including Salesforce Profiles, Roles, Permission Sets, sharing/access controls, and Dynamics 365 security roles and permissions.
- Performed smoke and regression testing for CRM releases and maintained reusable regression test suites.
- Managed the complete defect lifecycle using Azure DevOps/Jira, including logging, severity/priority assessment, triage, retesting, root-cause analysis, and closure.
- Participated in defect triage and collaborated with BAs, POs, Developers, SAs, and business users to resolve functional and integration issues.
- Supported UAT by preparing test scenarios, coordinating execution, analyzing failures, and providing defect/test status updates.
- Prepared test execution reports, defect metrics, QA status reports, risk assessments, and release-readiness updates.
- Supported go-live validation and post-production verification for business-critical Salesforce and Dynamics 365 CRM releases.
- Mentored QA team members and contributed to QA governance, test strategy, reusable test assets, and continuous improvement.

### Key Achievements:

- Successfully led QA across Salesforce and Microsoft Dynamics 365 CRM ecosystems within a large-scale enterprise CRM transformation programme.
- Improved test coverage through a common CRM testing strategy across Salesforce and D365, covering functional, integration, security, data, and end-to-end scenarios.
- Identified and resolved critical data and integration issues across CRM, API, middleware, cache, and database layers.
- Strengthened release confidence through structured regression, integration, and end-to-end testing across distributed CRM systems.
- Successfully validated complex asynchronous and event-driven integrations involving CRM and multiple external systems.
- Contributed to improved QA governance, defect detection, test coverage, and release quality.

Nov 2021 - Jul 2025

Senior Software Test Specialist

**COFORGE LIMITED (CIGNITI TECHNOLOGIES)**

Sr. MS Dynamics 365 QA Engineer

Client: Georgia-Pacific (Georgia, USA)

Project: Customer Experience (PCDC-CX)

- Led end-to-end CRM—ERP QA across Infor M3, Infor IDM, ION OneView, and Microsoft Dynamics 365 CRM, validating business

- processes and data flow across integrated enterprise applications.
- Performed Infor M3—Dynamics 365 integration testing, validating upstream ERP data, downstream CRM transactions, field mappings, transformations, and end-to-end data consistency.
  - Created upstream test data directly in Infor M3 using Tosca to support realistic D365 CRM scenarios, reducing test-data preparation effort by ~40%.
  - Validated BODs, API endpoints, and backend data pipelines with developers to ensure accurate data exchange across Infor M3, ION, and Dynamics 365.
  - Performed functional, integration, regression, smoke, and end-to-end testing across Sandbox and Production environments, including post-deployment validation.
  - Validated D365 CRM configurations including entities, business rules, forms, views, roles, profiles, permissions, and security, along with Power BI reports, Power Automate workflows, dashboards, and persona-based access.
  - Supported Tosca regression automation, including Tosca XScan control rescanning, test-step maintenance, and Execution List validation.
  - Performed API and database-level validation to verify transaction integrity and data consistency across ERP, integration, and CRM layers.
  - Collaborated with QA, BA, development, and integration teams on defect triage, root-cause analysis, fix validation, and end-to-end business-process readiness.
  - Maintained requirements, test cases, and defects in Azure DevOps and participated in Agile ceremonies.
  - Led offshore QA coordination at the Georgia-Pacific account level, managing daily team updates, blockers, dependencies, and delivery risks while coordinating internally with onsite coordinators and offshore QA teams supporting other GP projects.
  - Consolidated weekly, monthly, and quarterly QA reports covering project status, testing progress, defects, risks, dependencies, and resource updates for QA/Delivery leadership.
  - Coordinated QA resource interviews and performance reviews across offshore QA teams, onsite coordinators, and QA/Delivery leadership, consolidating feedback and ensuring finalized inputs were prepared for client review.
  - Implemented a Defect vs. Bug classification model, improving triage, traceability, and reporting accuracy.

**Key Achievements:**

- Reduced test-cycle time by 15% through reusable test strategies and regression assets.
- Improved defect detection by 30% through shift-left QA and early integration validation.
- Reduced test-data preparation effort by ~40% through Tosca-driven Infor M3 upstream test-data creation.
- Improved cross-team coordination across QA, BA, development, ERP, and integration teams to support smooth releases.

**Sr. Salesforce QA Engineer**

Client: Synovus Corp (Georgia, USA)

Project: Salesforce BAU & Migration Testing

- Supported middleware migration from TIBCO to MuleSoft, validating end-to-end data integration between FIS and Salesforce for a U.S.-based banking client.
- Performed migration/data validation, including field-level comparisons, source-to-target mapping, format/transformation checks, and data-integrity verification across SIT and UAT.
- Executed integration, regression, smoke, SIT, and UAT testing across 2-week sprint cycles and monthly releases.
- Validated API-based integrations using Postman and performed backend/data verification using SQL.
- Collaborated with development, BA, middleware, and QA teams on defect triage, root-cause analysis, and migration validation.
- Executed Tosca smoke/regression suites during monthly Salesforce Sales & Service Cloud releases.
- Managed test cases, defects, and traceability using Azure DevOps.

**Apr 2016 - Nov 2021**

Senior Test Engineer

## V2 SOFTWARE TECHNOLOGIES

Senior Test Engineer

V2 Software Technologies

Client: CBRE Group Inc.

Project: CBRE CX Enhancer (Multi-System Integration — Salesforce, SAP ERP & Customer Portal)

- Tested complex integrations between Salesforce (Sales & Service Cloud), SAP ERP, MuleSoft middleware, and a custom Customer Portal.
- Performed API & integration testing using Postman to validate real-time data consistency across systems.
- Used SOQL and Salesforce Workbench to validate data integrity across Salesforce and SAP ERP.
- Conducted security testing to ensure role-based access controls were correctly implemented.
- Tested UI/UX functionality of the Customer Portal to ensure intuitive and seamless user experiences.
- Collaborated with development teams to track and resolve defects and ensure stable releases.

Key Achievements:

- Enhanced data integrity by identifying and resolving critical cross-system integration defects.
- Led the QA team, ensuring timely execution, defect tracking, and risk mitigation.
- Contributed to improved UI/UX experience and platform performance for the CBRE Customer Portal.

Tools: Salesforce (Workbench, Inspector), SAP ERP, MuleSoft, Postman, SQL, Jira, ADO

## CORE SKILLS & CROSS-CRM EXPERTISE

---

### CORE SKILLS

- CRM Testing: Salesforce, MS Dynamics 365
- Functional, Integration, Regression, UAT Testing
- Workflow Automation: Salesforce Flows / Power Automate
- API Testing: Postman, REST, event-driven systems
- Integration Testing: MuleSoft, ERP (Infor M3, SAP)
- Security Validation: Roles, Profiles, Permission Sets
- Tools: Tosca, Jira, Azure DevOps, SQL
- QA Leadership: Agile/Scrum, Test Strategy, Defect Lifecycle, Risk Assessment, Release Readiness
- Quality Engineering: Shift-Left QA, Risk & Impact Analysis, Defect Prevention

### CROSS-CRM EXPERTISE

- Experience working across Salesforce and Microsoft Dynamics 365 platforms
- Strong understanding of common CRM architecture and capabilities
- Mapping expertise:
  - Entities (D365) ↔ Objects (Salesforce)
  - Security Roles ↔ Profiles & Permission Sets
  - Power Automate ↔ Salesforce Flows
- Expertise in platform-neutral test design reusable across CRM systems
- Integration testing across API, middleware, and distributed architecture
